EXPERIENCE

Montclair State Financial Aid, Montclair, NJ

June 2025 – Present

Financial Aid Analyst (Graduate/Project Assistant)

- Developed 5-year forecasting models using NASFAA guidelines to evaluate the impact of 2026 federal policy changes on student loan eligibility
- Partnered with Financial Aid Directors to analyze 25,000+ student financial aid records using SQL, improving reporting accuracy and supporting operational decision-making
- Used advanced Excel Functions (XLOOKUP, INDEX-MATCH) to locate students with missing funding by extracting reports through IBM Cognos Analytics
- Automated repetitive reporting workflows using Power Query, reducing manual data preparation time by 80%
- Implemented Google's Gemini API (AI) to automate scholarship matching based on factors such as GPA, Major, Financial Need and Affiliated Clubs.

PROJECTS

[MSU Financial Forecasting](#) | Technology Used: SQL and Excel

Worked with NASFAA to examine the impact of the One Big Beautiful Bill Act on students financial aid. Engineered advanced Excel lookup functions to extract complex datasets and established key performance indicators to drive a 5-year strategic financial forecast. Leveraged SQL to clean up the data, created CTEs and views, and arranged the data for illustration purposes.

[Bank Loan Correlation](#) | Language Used: Python, SQL, Tableau

Obtained US bank loan data from Kaggle database to find out if there were correlations between loan acceptance and customer acceptance. Built Predictive Classification models (KNN, ANN, Random Forest), cleaned up and arranged the data with SQL, and then visualized it. Summarized using Gemini API Key (AI), creating improvements on model interpretability through AI-generated business recommendations.

SKILLS, LANGUAGES, AND INTERESTS

Technical: Python (Seaborn, Pandas, MATLAB, Spacy, SciKit-Learn), SQL, Tableau, MS Excel (SUMIFS, XLOOKUP, Pivot tables), Jira, Scrum, Kanban, HTML5, CSS,

Certifications: Excel Specialist, Atlassian Project Management, Microsoft Generative AI
