QUALIFICATION SUMMARY

Business Analytics student with experience in cleaning, analyzing, organizing, and visualizing data with SQL, Python, Machine Learning, Artificial Intelligence, MS Excel, and Tableau.

EDUCATION

Montclair State University, Montclair, NJ

Expected: Aug 2027

Master's Degree in Business Analytics

Extra-Curricular: Active Member of MSU Chess Club

Spring 26-Present

Relevant Courses: Advanced Business Statistics, AI in Business Analytics, Data Wrangling Analysis, Advanced Data Mining

Montclair State University, Montclair, NJ

Expected: Dec 2025

Bachelor's Degree in Business Analytics

Minor in Finance

Extra-Curricular: Board Member of Data Driven Student Alliance

Fall 22-23

Relevant Courses: Programming in Business, Foundations of Business Analytics, Database Systems, Data Mining, Text Mining, Big Data management, Crypto-currency, Investment

EXPERIENCE

Montclair State Financial Aid, Montclair, NJ

Feb. 2026 – Present

Data Analyst Co-op

- Used Machine Learning (KNN, ANN, Random Forrest), Natural Language Processing (SpaCy) for text mining, and data frame processing (Pandas) to clean, format, and organize dirty data regarding product information using data prediction with clean data.
- Increased efficiency by 8 times of data cleansing of monthly reports by creating and implementing an algorithm to predict sorted and cleansed data.
- Used similar tools to determine classification of products to improve efficiency for the data entry and cleaning team.
- Used Excel to further implement and analyze data processing to ensure output quality of data prediction.
- Used Google's Gemini API to organize product categorization based on factors such as product name, description, manufacturer, packaging, and company.

PROJECTS

Covid-19 Data Exploration | Technology Used: SQL, Tableau, and Excel

Used CDC database to examine Covid-19 metrics worldwide. Created a SQL Server of the data and leveraged SQL to clean up the data, created CTEs and views, and arranged the data for illustration purposes. Utilized Tableau to visualize data pulled and created key metrics for analysis.

Movie Correlations | Language Used: Python

Obtained US movie data from Kaggle database to find out if there were correlations between movies in the past 40 years. Used Python to clean up data, arranged the data and visualized it. Used Python's concept of SEABORN, PANDA, and MATLAB throughout the project.

SKILLS, LANGUAGES, AND INTERESTS

Technical: Python (Seaborn, Pandas, MATLAB, Spacy, SciKit-Learn), SQL, Tableau, MS Excel
(SUMIFS, XLOOKUP, Pivot tables), HTML5, CSS

Certifications: Tableau Specialist Certification

Languages: Fluent in Farsi
